NEW - 3068 Series Door
Weld-N-Go™ System
Design specifically for the Container Modification industry. Comes equipped with 2"x3" or 2"x4" square tube frame and 3'-0" x 6'-8"
Commercial Grade Door Heavy Duty with 90 minute fire rating. Ready for installation.
**CALL FOR OTHER SIZES**
NEW - 6068 Series Door
Weld-N-Go System
Design specifically for the Container Modification industry. Comes equipped with 2"x3" square tube frame and 6'-0" x 6'-8" Commercial Grade Door Heavy Duty with 3 hour fire rating. Ready for installation

**CALL FOR OTHER SIZES**
Threshold Plate
Aluminum thresholds have a dull finish; all have mounting holes and are furnished with screws. They are UL classified for use with wood fire doors rated for 90 minutes and metal fire doors rated for 3 hours (unless noted). To Order: Please specify length: 3, 4, or 6 ft. where applicable.

Door Sweep
Has an arched, flexible vinyl insert that creates a tight seal. The flange has slotted mounting holes so you can adjust for doors that have been cut too short. A drip cap keeps dust, rain, and slush away from the bottom of the door. For use on outside doors.

Weather Striping
This foamed version of the polyvinyl chloride (PVC) rubber. Material is closed cell, which means that each cell is completely closed, restricting water, air, and gas from passing through.
Specifications:
For Doors - 1 3/4" thick standard 4 1/2" minimum stile width for single or double door application using standard 239 strike and pull or lever trims.
Chassis - Steel (Panic Grade), steel (Fire Grade)
Cover - Covers stock hollow metal doors with 161 cutout.
Mounting - Furnished standard with wood and machine screws. Available with thru bolts on request. Thru bolts are included and standard packaging on fire rated devices.
End Cap - Steel construction.
Hand - Non handed, center hub.
Latch Bolt - Stainless steel 3/4" throw.

700 Series Door Closer

Features:
- Dual valve, closing and latching speed controlled by two separate regulating valves.
- Universal application, non handed, designed for all standard installations.
- Reinforced type adjustable tube arm.
- Rack and pinion operation contained in a high tensile precision cast aluminum housing for the highest quality.
- High quality hydraulic fluid for high lubricity and constant lubrication.
- The streamlined design permits installation on most commercial and residential applications without adaptors.
- Power adjustment bracket on regular arms. (15% adjustment, ± 7)
- Hold open arms (optional) are adjustable for holding from 90° to 180°, 701/702
- Fusible link hold open arms (optional) FUS707
- Optional back check (730P-BC, 740P-BC, 750P-BC) controlled by separate regulating valve
- Slim cover (2" W x 3 1/8" H x 10 3/4" L) optional fits all sizes, COV/700
- Flat drop bracket
- Available in Alum, Duro, Gold, US3, US26

Universal Applications
3636 Series Window
Weld-N-Go™ System
Design specifically for the Container Modification industry. Comes equipped with 2”x3” or 2”x4” square tube frame and 36” x 36” White Aluminum Slider Window Dual Pane with Grids and Security Bars. Ready for installation

100 SERIES LOUVER VENT
- Heavy duty construction.
- Used for flush mounting.
- 8x8 perma-coated screen attached for insect protection.
- Machine tab-fold construction.
- Wide mounting flange.
- Built-in weather protection

TURBINE WHIRLBYIRD BIB-12
- Permanently lubricated upper and lower ball bearings that ensure long life and no maintenance.
- All-aluminum rust-free construction.
- Rigid spider-type structure.
- Riveted at every connection.
- 21 air-foil curved vanes with rolled vane edges to deflect water.
- Large flashing for easy installation.
- Tested to withstand winds of 147 m.p.h. Reduces energy bills.
- Reduces winter ice build up.
**LOCK BOXES AVAILABLE**

- **BULLDOG LOCK BOX**
  The most secure and very user friendly lock box in the industry.

- **STANDARD LOCK BOX**
  A very secure lock box made of 1/4” material and reasonably priced.

- **FLANGED LOCK BOX**
  Most cost effective box offered. Allows for possible lag bolt option for easy install in the field.

**TECHNICAL SOLUTIONS THAT WORK FOR YOUR BUSINESS**

BUILT RITE INDUSTRIES creates solutions to fit the needs of the container industry. BUILT RITE’S Lock Boxes are no exception. Lock Boxes are just a few of the items manufactured for the security of shipping containers and the safe storage of the users valuables from vandals and theft. All of our Lock Boxes are made from steel and range in thickness depending on which model you choose. The Bulldog and Standard Lock Box are made from 1/4” thick material. The Bulldog has an added flat bar flange to raise the box above the door gasket and creates a nice area for welding. It also incorporates a security angle flange at the top left corner that is welded to the inactive door so no thieves can cut through the padlock tab. The bottom of the box has 5/8” round stock weld to the perimeter to prevent cutting or tearing through the lock box. The Flanged Lock Box is manufactured with 3/16” steel and has a primer finish. The flange allows for welding or drilling holes and lag bolting the box into place while in the field.

Tab is welded to the inactive door. The tab is 2" wide. You will have 3/8" space on either side of the window for extra play and welding space away from door gasket.
Model 650 Specifications

Full width galvanized steel barrel totally encloses the drums, springs and axle. Barrel type construction reduces door sag, eliminates drum dents and improves operation due to an even support of the curtain for the entire width.

Oil-tempered helical torsion springs are factory lubricated to minimize friction and corrosion while increasing the torsion cyclic life. Spring wire conforms to ASTM A 229.

All drums are fitted with a grease filled, shielded radial ball bearing to contribute to a smoother operation and reduce wear and friction.

Galvanized and pre-painted with long lasting silicone polyester paint, the 26 gauge corrugated curtain is roll formed from ASTM A 663 grade 60, full hard steel. This premium steel yields greater door strength and minimized curtain damage. Full height felt tape on back of curtain prevents nesting and reduces paint rubbing. 20 colors are standard with others available on special order.

Factory installed galvanized, reinforced 12 gauge brackets are designed to easily snap onto the guides, reducing installation time.

Galvanized, guide mounted head stops are simple to install and prevent curtain over travel when raising door. Installed through guide after curtain is lowered, they provide definite contact with bottom bar angle.

The spring tensioner assembly is factory installed on the end of the door axle and allows precise fine tuning of the initial spring tension. Increments of 1/16" turn are possible. Tensioner adjusts both springs equally at the same time from only one end of the door.

Roll formed, 18 gauge galvanized guides are fitted with dual polyethylene wear strips to reduce friction and muffle door noises. All guide attachment to jamb is performed through the guides without the addition of clips welded to the back of the guide. This gives a neater appearance, increased strength and aids in tight installations.

Standard stainless steel cove, slide and four attachment bolts are factory installed. The slide exhibits magnetic properties that can be used to activate a guide mounted security sensor. Latch accepts all industry padlocks, including 7/16" diameter shanks. Provision for cylinder lock is included.

Roll formed galvanized steel bottom bar, reinforced with a 2" x 1-1/2" x 11" gauge full width galvanized angle that extends fully into the guides. A PVC bulb astragal provides positive contact with the floor. Lift handles installed on exterior side of bottom bar and a non-rotting pull rope are attached on the inside angle.

NEW - Prefab Wood Office Kits — 20’, 40’ & Combos

NEW - Prefab Wood Office Kit

- CSIP - All required Container Structural Insulated Panels based on the kit ordered. The panels are made with 2”x3” wood studs 16” O.C. and have a 1/4” ACX plywood sheet as the finished face. All walls have an R-13 rating.

- Electrical Package - 125 AMP Breaker Box, three 15-AMP and one 20 AMP breaker, two four foot fluorescent 2 bulb light fixtures, 12-2 Romex wire, exterior junction box, gang boxes pre-mounted in walls, one light switch, three outlets. All Products UL Rated.

- Weld-N-Go Systems™ – All offices come with two Weld-N-Go™ Windows and one Weld-N-Go™ Man Door. The 16 foot Office/Storage Combo Kits include a partition wall and a Weld-N-Go™ Field Goal Man Door.

- System does not require any special support systems to hold the walls or roof in place. All walls are toe nailed to the container floor and the roof is supported by the sidewall. Roof is suspended so electrical can run in any direction.

- A/C Unit – An 8,000 BTU Air conditioning unit with heat pump 115 Volt and A/C Cage is included in each office kit. Up grades to 12,000 BTU with heat pump or a Bard 1 Ton with heat pump is available.

- Accessories – Two gallons of gray floor paint, lockset, threshold plate, and door sweep are all included in the kit.

CONTAINER SECUREWALL PARTITION
The non-load bearing wall divider is manufactured in 20" wide section that locks together without the use of exposed screws. It is installed vertically to minimize dust. This 26 gauge wall is much more economical than sheet rock or wooded studs while it still provides the necessary level of security you come to expect in a wall. All channels and angles necessary to install securewall are included. Colors available are grey galvalum, glossy white and white.

UNEVEN GROUND PROBLEMS
In just minutes, an uneven ground issue can be resolved with the Container Leveler.

STRONG
The Container Leveler can handle loaded containers and lift over 20 tons.

SIMPLE
The Container Leveler is easy to use and can be put into place almost effortlessly. Any operator can use this tool.

Cost Effective
Solve problems in the field easy by sending your driver or service trucks with this new tool. No more expensive service calls.

BUILT RITE INDUSTRIES has developed a tool that is essential for all container operators and handlers. The Container Leveler solves uneven ground problems. It is a must for the ease of leveling containers that are set on uneven ground. This is the most common issue for racking of container doors and the rocking of a unit when set into the desired location. The Leveler is made of 1/2” thick steel plate and designed to fit into any part of the bottom corner castings by using a twistlock head. The head allows for the pin to be secured into place. A 12—20 ton bottle jack is used to lift the container off the ground. Shims can be put into place to prevent the rocking of the container when set back into place. The Leveler is easy to use, compact and efficient. The best tool for container handlers.
